

SANDER RONDE

Full-stack developer

Leiden, The Netherlands

Nederlandse versie op sanderron.de/cv.nl.pdf

PROFILE

I have a passion for solving hard problems in either the frontend or the backend, never giving up until the problem is solved. This passion translates to the physical world as well, solving various “problems” such as having to turn on the lights manually, by using microcontrollers and a bit of programming instead. I’m also a quick learner, which I put to use by exploring new software or languages regularly. Finally, I have strong analytical skills and an eye for detail.
